

REMOTE MONITOR SOFTWARE®

FOR MECTA SPECTRUM 5000 ECT DEVICES

Users of RMS (Remote Monitor Software®) know how useful it is to view real-time ECT physiological monitoring on a large computer monitor and replay them as needed. But how to organize the raw treatment data file?

MECTA RMS MANAGER® is a breakthrough in ECT data management. So easy to use, and perfect for clinics with more than one treating physician.

MECTA RMS MANAGER® DATABASE

REMOTE MONITOR SOFTWARE®

Patient Treatment Data Imports to MECTA RMS MANAGER

Perform analysis on treatment results, manage dosing and monitor continuous ECT treatments. Print, export and backup data.

**Training includes:** RMS manual and RMS DVD/video.

**A physician's most precious asset is TIME.**

Why waste any of it when MECTA RMS MANAGER can store and retrieve the patient information you need with just a few keystrokes?
